COMPANY PROFILE

UZAY SISTEM Machinery, Industry and Trading Co. Ltd. is one of the major companies of TURKEY, established in Istanbul, 1986 providing turn - key projects from design to construction. Although space frame systems are our speciality, we provide not only steel structures but a complete package of construction including but not limited to rainwater drainage system, cladding, siding, glazing, aluminium/glass curtain walls. Its fabrication works are being carried out within our factory with total area of 12.000 m2. Unique structures of UZAY SISTEM are composed of pipe/tubular steel frames, nodes (spheres), bolts, nuts and pins which are produced by our own machinery. The space frame systems can be given variety of forms such as flat plate, vault, dome, pyramid etc. and also can be used in various tower and bridge constructions. Coordinating with architects and clients, our engineers make visions come true, merging function and aesthetic. To reconcile vision and creative ideas with the laws of constructional physics; conceptual and technical know-how and experience are required. These are the qualifications that UZAY SISTEM has and we take advantage from them throughout all the construction process; from conception to assembly. A team of experienced professionals - engineers, craftsmen and mechanics - decide what is technically feasible and safe.
